

## INDIVIDUAL RESEARCH PROJECTS

**K**LAUS BAER was epigrapher at the American Research Center in Egypt-American Museum of Natural History expedition at Hieraconpolis. He concentrated on paintings from tombs of Dynasty XVII (ca. 1645 B.C.) and the New Kingdom (ca. 1520), and on graffiti from a nearby rock cleft. In the latter two areas he was able to recover earlier layers of representation that had been obscured by the subsequent scenes and inscriptions.
