Published 1998. Printed in the United States of America.

Printed by McNaughton & Gunn, Saline, Michigan

The paper used in this publication meets the minimum requirements of American National Standard for Information Services — Permanence of Paper for Printed Library Materials, ANSI Z39.48-1984.

For Irene, Joachim,
Sybilla, and Stephanie

History is not simply the history of kings or political history. There is a tremendous, untapped field — the social and economic history of ancient times.

— Ignace J. Gelb, *Approaches to the Study of Ancient Society*

PREFACE

The Asiatic Collection of the Oriental Institute Museum of the University of Chicago houses approximately 2,700 cuneiform tablets that date to the so-called Third Dynasty of Ur (2112–2004 B.C.) and which were not recovered during regular archaeological excavations. The majority of these tablets were purchased on the antiquities market. This volume presents all of the 499 cuneiform documents in the Asiatic Collection that date to the reign of Šulgi (2094–2047 B.C.), the second ruler of the Ur III Dynasty, and were issued within the organization of the ancient administrative center Puzriš-Dagan (modern Drehem).

I attempt herein to explore new ways of editing Ur III cuneiform documents of socio-economic relevance, with the arrangement of the individual administrative records being based exclusively on information given by the tablets themselves. Therefore, special attention has been paid to certain characteristic features of the cuneiform documents, such as text formula, date, provenance, prosopographical background, and administrative affiliation. A detailed description of the principles governing the methodological disposition of this volume is found in *Section 1. Introduction*, below.

Following a suggestion by Professor Miguel Civil, I began my work on the “unexcavated” Ur III tablets in the Asiatic Collection in the fall of 1993 during a one-year stay as a student-at-large at the University of Chicago. I am grateful to be given the chance to make a highly interesting and scientifically valuable part of the tablet collection of the Oriental Institute Museum available to the scholarly public. It is my firm hope that the administrative documents edited in this volume will contribute to the knowledge we possess about the social and economic history of the Ur III period and one of its most distinctive administrative centers.

Professor John A. Brinkman, Curator of the Oriental Institute Tablet Collection, generously granted me permission to work on and publish the cuneiform tablets and objects presented in this volume.

Markus Hilgert
Philipps-Universität, Marburg

ACKNOWLEDGMENTS

In the United States, I thank Professor Miguel Civil who first brought to my attention the Ur III tablets in the Asiatic Collection and whose constant encouragement and generous willingness to share his immense knowledge were of invaluable help to me while preparing this volume; Professor John A. Brinkman, Curator of the Oriental Institute Tablet Collection, who kindly granted me access to the tablet collection at the Oriental Institute Museum and supported my work on the tablets with various comments and helpful suggestions; Professor Piotr Steinkeller for numerous constructive comments and ideas; Professor Wolfgang Heimpel with whom I was able to discuss some of the philological problems arising from the tablets; Professor Robert D. Biggs and the Oriental Institute Publications Committee; Thomas A. Holland and Thomas G. Urban of the Oriental Institute Publications Office for their kind and most professional help far beyond the ordinary; Karen L. Wilson, Director of the Oriental Institute Museum; John A. Larson, Oriental Institute Museum Archivist; Jean Grant, Oriental Institute Museum Photographer, who took excellent photographs of several cuneiform tablets published in this volume; Raymond Tindel, Oriental Institute Museum Registrar; and John C. Sanders, Head of the Oriental Institute Computer Laboratory.

In Germany, I thank my teacher, Professor Doctor Dietz O. Edzard, whose scholarly advice has been an immeasurable source of knowledge and support in all stages of preparing this volume; Professor Doctor Manfred Krebernik whose ingenious software generated the database serving as groundwork for the indices published here; Professor Doctor Hartmut Waetzoldt for various constructive comments on the transliterations; Professor Doctor Walter Sommerfeld to whom I owe, among many other things, my interest in cuneiform documents from the Ur III period; and Professor Doctor Walter W. Müller.

Although I have taken advice from all of the scholars mentioned above, mistakes remain solely my responsibility.

I express my gratitude to the German Fellowship Foundation and the DEY Foundation for their generous financial support over many years.

Finally, I thank Stephanie whose deep friendship and understanding as well as her always sensible advice have been an infinite source of encouragement, support, and strength.

1. INTRODUCTION

1.1. UR III ADMINISTRATIVE DOCUMENTS FROM DREHEM AT THE ORIENTAL INSTITUTE

This volume contains transliterations, indices, and analytical charts for all of the cuneiform tablets and objects from Drehem dating to the reign of Šulgi in the Asiatic Collection of the Oriental Institute Museum. The 499 documents published herein were not recovered during regular archaeological excavations but became part of the Asiatic Collection of the Oriental Institute Museum through purchases made from antiquities dealers and private collectors between 1919 and 1952. Since the original archaeological context of the tablets is missing completely, it is of particular interest to trace the history of their acquisition and to name the people and organizations involved in this process. Of course, such data can never be considered even remotely as valuable as the primary archaeological information, which would pertain to questions such as the exact provenance, date, context, and — ideally — also to the archival background of a cuneiform tablet. However, taking a closer look into the history of a tablet collection may yield information enabling us to link individual tablets or tablet groups to similar parts of other collections and, with some luck, to the name of antiquities dealers in the Near East. Eventually data thus gathered may render a more detailed picture of the external parameters (e.g., origin, volume, geographic and chronological distribution) characterizing the textual evidence of the Ur III period known so far.

The data presented below reflect the acquisition history of the 499 tablets as gathered from the records of the Oriental Institute Museum Archives. The information was collected from all accessible sources to date and is intended to render any detail that might be important in determining the particular history of a tablet.¹

The Oriental Institute Museum (OIM) registration numbers of the cuneiform tablets edited in the present volume range between A2517 and A29367. The tablets OIM A26354, A26364, A27983, and A29367 were acquired by the Oriental Institute Museum between 1946 and 1952. The bulk of the tablets, however, entered the Asiatic Collection (A) between 1920 and 1924. The Oriental Institute Museum registration numbers of these texts span between OIM A2517 and A5994 and comprise tablets of five different acquisitions. Accession numbers of the Oriental Institute Museum were assigned for each acquisition and the individual objects were given consecutive numbers in the Oriental Institute Museum Asiatic Collection. The following sections list information concerning the individual acquisitions marked by their accession number.

1.1.1. Accession Number 234 (OIM A2510–A2529)

Accession number 234 was recorded in the files of the Oriental Institute Museum on 21 July 1920. This acquisition consisted of “1 box,” which contained a “Gold tablet with Assyr. inscr., gold collar inscr., 15 tablets, 3 stone objects.” The acquisition was made by James H. Breasted on 2 July 1920 “from Dumani Frères Cie., Rue Hauteville, No. 35, Paris, France,” at the price of “24,800 francs.” The objects of the acquisition were labeled as “Lot No. 25.” Breasted personally took the gold objects with him back to Chicago, the remainder of the acquisition was shipped by “parcel post.” The record for accession number 234 concludes with the following note: “Tablets and stone objects read Oct. 6 and 7, 1920.”

1. The data concerning the acquisition history of the Oriental Institute Museum cuneiform tablets published in this volume were provided by John A. Larson, the Oriental Institute Museum Archivist, during April 1995.

1.1.2. Accession Number 248 (OIM A2536–A2792)

On 27 September 1920 “1 box” containing “258 cuneiform tablets, incl. one forgery, cast” was assigned the Oriental Institute Museum accession number 248. The objects, labeled as “Lot No. 5,” were acquired by Breasted on 4 December 1919 in Cairo from Nicolas Tano and shipped to Chicago by Tano “per Congdon & Co., c/o G. W. Sheldon & Co.”²

Unfortunately, the records of the Oriental Institute Museum do not mention whether the objects were purchased by Breasted and, if so, what price he paid.

1.1.3. Accession Number 261 (OIM A2794–A3598 and A3737–A4085)

Breasted purchased “Cuneiform tablets etc.” inventoried as accession number 261 in “Western Asia, Winter 1919–20,” for “7.200 Rupees” from Georges Khayat, an antiquities dealer who ran his business in Baghdad at that time. Labeled as “Lot No. 20,” the tablets arrived in Chicago in “W. W. Luckenbill’s baggage”; their accession was recorded on 7 October 1920.

1.1.4. Accession Number 262 (OIM A3599–A3736)

Also on 7 October 1920, “Cyl. Seals, Tablets, etc.” purchased by Breasted in “Western Asia, Winter 1919–20,” were registered as Oriental Institute Museum accession number 262. James H. Breasted had bought the items from T. Meymarian, Baghdad, and paid “3.500 Rupees.” “Lot No. 21” reached Chicago in “W. W. Luckenbill’s baggage.”

1.1.5. Accession Number 487 (OIM A4126–A5997)

Oriental Institute Museum accession number 487, assigned on 18 June 1924, comprises a large group of cuneiform tablets purchased by the Oriental Institute from a New York based organization called “The Chaldean Rescue” at the price of “\$1200.” The tablets were shipped to the Oriental Institute by “J. C. Walsh, 503 Fifth Ave., New York City.”

According to the records of the Oriental Institute Museum, the head of “The Chaldean Rescue” was a certain “Father Naayem,” a “priest of the Chaldean Rite,” whose family had lived in Urfa/Edessa before World War I. “The Chaldean Rescue” was located at “503 Fifth Avenue, New York, NY” (Seymour Building), among its members were prominent bishops and Roman Catholic priests of the Archdiocese of New York. It remains uncertain where and when Father Naayem acquired his sizable collection of cuneiform tablets.

1.1.6. Accession Number 2877 (OIM A26318–A26406)

Oriental Institute Museum accession number 2877, dated 26 September 1946, consists of a total of eighty-nine registered items: clay tablets, cones, plus three additional tablets and one cone in poor shape, which were not registered. This collection was acquired by purchase from Mrs. Florence W. Duncan, 2900 Seventh Street, N. E., Washington 17, D.C.

Mrs. Duncan was the widow of Dr. George S. Duncan of the same address, who died on 9 June 1946. It appears that Mrs. Duncan was paid \$80.00 for “80 Babylonian cuneiform tablets at \$1.00 each.”

1.1.7. Accession Number 2989 (OIM A27979–A27987)

Oriental Institute Museum accession number 2989, dated 2 December 1948, consists of a total of nine items: six clay tablets (OIM A27979–A27984) and three cylinder seals (OIM A27985–A27987). The objects, previously be-

2. For Nicolas Tano, an important dealer of Egyptian and Near Eastern antiquities, see Warren R. Dawson and Eric P. Uphill, *Who Was Who in Egyptology* (London: The Egypt Exploration Society, 1972 [2nd rev. ed.]), p. 284.

longing to the collection of Mr. Chauncey McCormick of Chicago, were a gift of the Art Institute of Chicago to the Oriental Institute Museum.

1.1.8. Accession Number 3218 (OIM A29364–A29367)

Oriental Institute Museum accession number 3218, dated 23 October 1952, consists of a total of four items: a Seleucid astronomical tablet (OIM A29364) and three Ur III economic tablets (OIM A29365–A29367).

A letter from Mr. E. S. David in the Oriental Institute Director's Office Correspondence Files, dated 22 October 1952, mentions that he is enclosing "the bill for the 4 clay tablets" and refers to a visit to Chicago that David had made the previous week.

E. S. David was a well-known antiquities dealer who offered and sold antiquities to the Oriental Institute Museum over a period of many years. Occasionally, David also donated objects to the Museum. It was not possible to locate any additional information on this particular accession in the files of the Oriental Institute Museum Archives.

1.1.9. Provenance

As mentioned above, the majority of the Ur III cuneiform tablets in the Asiatic Collection of the Oriental Institute Museum were purchased on the antiquities market and therefore reached the collection without any primary archaeological information concerning their provenance. The file card catalog of the Asiatic Collection, however, gives a more or less detailed provenance for almost every tablet, but in many cases the provenances recorded are erroneous. Various cuneiformists have helped to build and complete this file card catalog, gradually adding notes on measurements, contents, date, and provenance of the cuneiform tablets. As far as the provenance of the majority of the tablets is concerned, however, the entries in the file card catalog seem to be based on the information antiquities dealers sometimes offered along with the clay tablets. The following is a synopsis of the provenances of cuneiform tablets in accession numbers 234, 248, 261, 262, and 487 as provided by the file card catalog of the Oriental Institute Museum's Asiatic Collection. No information on the provenance of cuneiform tablets in accession numbers 2877, 2989, and 3218 could be gathered from the pertinent sources.

Accession Number:	234
OIM:	A2510–A2529
Provenance:	"Iraq" (A2510–A2516) "Iraq, Warka" (A2517–A2527)

 "Iraq, Drehem(?)"
 (A5286)
 "Iraq, Larsa"
 (A5501)

1.2. "ARCHIVAL APPROACH"

In 1967, Ignace J. Gelb explained his idea about the "primary interpretation" of textual data provided by cuneiform documents as follows:

The approach here is mainly philological, because it involves the interpretation and ordering of lexical items, based on primary evaluation of the writing and grammar of the original sources. This is the stage in which a serious attempt must be made to arrive at some general, preliminary interpretations based on what may be called "the archival approach."

The archival approach is based on an intensive study of texts of one period and one site, and within them, if possible, of one archive.

... The archival approach is crucial. ... In the exploitation of the archival approach the deepest penetration and the most fertile results are achieved through prosopography, that is, the study of the careers of persons and personnel occurring in an archive, as revealed by their names, titles, professions, and functions.³

3. Ignace J. Gelb, "Approaches to the Study of Ancient Society," *JAOS* 87 (1967): 2–4.

With his methodological remarks on how to approach the study of “the social and economic history of ancient times,” Gelb postulated new standards and set out guidelines for all Assyriological research focusing on socio-economic questions. Apart from textual sources dating to the early third millennium B.C., Gelb considered especially the “large mass of undigested Ur III material” as a promising ground on which to exercise his approach and prove its practicability.

While today confinement to texts from one period and one site along with an extensive treatment of prosopographical questions is considered a natural prerequisite for socio-economic studies focusing on ancient Mesopotamian societies, research on single archives still poses a considerable number of difficulties in many cases, which is particularly true for economic records dating to the Ur III period. Although, in general, the internal criteria of an Ur III administrative document allow for defining its provenance, date, administrative context, and prosopographical background with considerable precision, describing its exact archival affiliation or context is largely close to impossible. Responsible for this apparently contradictory situation is our complete lack of information concerning how large Ur III administrative archives were structured and organized.⁴ Which records were stored together? Were there duplicates of particular texts? Who was the “Archivherr” and who the “Leitperson”? Were the archives of large administrative units subdivided into smaller archives belonging to their subordinate departments? Should we think of an archive as a physical building in which large amounts of records were stored over a period of time? How long were records kept? Who was responsible for the archives, who for the keeping and updating of records?

This line of questioning could be extended easily and illustrates that in the case of Ur III administrative records, the majority of which were typically not recovered from their original archaeological context during regular excavations, the actual reconstruction of administrative archives has to be delayed until more details enable us to answer some of the questions raised above. The “archival approach” still remains an essential postulate for the philological work on cuneiform texts of socio-economic relevance; at present, however, some of its implications cause insurmountable difficulties.

Fifteen years after Gelb introduced it, Piotr Steinkeller first connected Gelb’s methodological concept of the “archival approach” with the edition and publication of Ur III administrative texts:

In view of the fact that interest in the socio-economic aspects of Ancient Mesopotamia has enjoyed a great increase in the last two decades, a reminder that economic texts make little sense and yield even less information unless studied in homogenous series may appear trivial and out-of-date. However, perusal of some of the recent publications of Ur III-texts brings about an uneasy realization that the concept of the “archival approach,” for which I. J. Gelb argued with such an infectious enthusiasm ... , has yet to take root in the minds of many cuneiformists.⁵

Steinkeller also formulated principles that ideally ought to govern the edition of Ur III administrative texts:

Minimum requirements for an up-to-date edition of a diversified group of Ur III tablets should be: 1) ascertaining the documents’ provenience and 2) identifying the archives or bureaus to which they belonged.⁶

While “ascertaining the documents’ provenience” might be comparatively easy for most administrative documents dating to the Ur III period, one faces much more serious obstacles when trying to identify “the archives or bureaus to which they belonged,” as indicated above. However, it should be emphasized that a text edition can largely facilitate the study of socio-economic questions of ancient Mesopotamia if it represents the attempt to arrange the textual material so that it clearly illustrates the consecutive business transactions conducted at various ad-

4. For a discussion of the problems involved in identifying Ur III archives, see G. van Driel, “Private or Not-so-Private: Nippur Ur III Files,” in *Cinquante-deux réflexions sur le proche-orient anciennes offertes en hommage à Léon de Meyer*, edited by H. Gasche, M. Tanret, C. Janssen, and A. Degraeve (MHEO 2; Leuven: Peeters, 1994), pp. 181–92.

5. Piotr Steinkeller, “On Editing Ur III Economic Texts” (Review of *Les Tablettes cunéiformes de l’époque d’Ur des collections de la New York Public Library*, by Herbert Sauren), *JAOS* 102 (1982): 639.

6. *Ibid.*, p. 639.

ministrative units under the authority of one or more officials. Although such an attempt requires exact information concerning the provenance, date, contents, and prosopographical background of the administrative documents studied, its methodological concept ranges far below the level of identifying actual archives and bears considerable potential for errors and misunderstandings.

This circumstance might explain why recent publications of Ur III administrative texts have chosen more straightforward and less confusing principles of text arrangement, such as the consecutive order of the museum numbers,⁷ text formula,⁸ contents,⁹ state of tablet-preservation,¹⁰ or personal scientific interest of the author,¹¹ to name only a few.

In this volume, the texts are arranged in accordance with the theoretical assumption that the records of expenditures of animals and goods were kept as transaction receipts by the administrative unit conducting the expenditure. In order to avoid the controversial term “archive,” a distinguishable administrative unit expending animals and goods is called a “bureau” and named after the official conducting the expenditure (or receiving deliveries, respectively). This arrangement, however, does not mean to imply that these “bureaus” necessarily existed as independent administrative units that were geographically separate from each other. The use of the term “bureau” merely represents a theoretical concept introduced to describe continuous administrative activity under the authority of one or more consecutive officials.

Where deliveries are attested, they have been arranged separately in order to contrast incoming and outgoing assets. The documents are arranged in a chronological order that takes into account the usage of the so-called min-calendar in texts from Puzriš-Dagan from the year Šulgi 44 onward.¹² The individual text groups are arranged according to the earliest date found within each group. For example, *Section 3. Bureau of Narām-ili* with the earliest date –/VII/Š 26 (Text 1) precedes *Section 4. “Archive” of Šulgi-simtum* in which –/VI/Š 29 (Text 18) is attested as the earliest date.

Each of the expending officials mentioned in Texts 460–480 (*Section 15. Documents Issued by Various Bureaus*) is attested only once within tablets of the Asiatic Collection of the Oriental Institute Museum. Therefore, the documents are grouped separately and arranged in chronological order.

Texts 481–499 (*Section 16. Documents of Unclear Affiliation*) are not assigned to any “bureau” because their exact administrative affiliation is unclear; included in this section are texts that are poorly preserved and the date, provenance, or administrative significance of which could not be determined beyond a certain doubt.

Finally, it must be emphasized that the principles chosen here for the edition and publication of Ur III administrative texts do not claim or even attempt to reconstruct archives or archival structures. They also fail to answer questions related to the general internal structure of Ur III archives. Rather, they should be understood as preliminary, theoretical aids created to illustrate the complicated administrative procedures that are documented in the Ur III administrative documents from Dreheim. The application of these principles, however, constantly raises justified questions as to their legitimacy and practicability. In any case, they are intended to leave room for criticism and improvement. Currently, without supporting archaeological data, the “archival approach” of texts dating to the Ur III period remains a demand still to be completely satisfied in the future.

1.3. CONVENTIONS OF TEXT EDITION

1.3.1. Selection of Texts

Since the documents do not stem from regular archaeological excavations, the selection of texts for publication in this volume was largely determined by their provenance and date, which are based exclusively on internal evidence. Often enough, the usage of the local Drehem calendar alone provided sufficient information about the origin of a tablet.¹³ In doubtful or ambiguous cases, administrative affiliation, text formulae, and contents frequently supported or caused the assignment. However, some texts posed too many unanswered questions to allow any final conclusions concerning their origin; these texts are marked accordingly with “provenance uncertain.”

1.3.2. Transliterations

The transliterations of Ur III administrative documents follow the conventions established by Rykle Borger, *Assyrisch-babylonische Zeichenliste*, and Friedrich Ellermeier, *Sumerisches Glossar*.¹⁴ Graphic variants of a cuneiform sign in use during the Ur III period and transliterated identically are indicated following Nikolaus Schneider, *Die Keilschriftzeichen der Wirtschaftsurkunden von Ur III*.¹⁵ The cuneiform texts edited in this volume usually employ the sign KWU 428 (𐎧𐎢𐎠𐎫𐎠𐎺) to express P Û. KWU 428 is not indicated in the transliterations. Marked, however, are cases where KWU 418 (𐎧𐎢𐎠𐎫𐎠𐎺) is used to render P Û.

Transliterations of texts with only one column of script are assigned continuous register-numbering. Within transliterations of multi-column documents, the registers of each column are counted separately. Indented lines within a register are preceded by “/” and “———” indicates empty registers. When the empty register of a text covers more space than the average inscribed register within that text, it is rendered as “——— (space)” in the transliteration.

Consecutive cuneiform signs that are broken or half-broken are indicated by only one set of either square-brackets or half-brackets when the signs suffer from a single damage to the tablet surface. Several different damaged spots affecting the legibility of consecutive signs are marked accordingly. The terms “preceding section broken” and “following section broken” indicate an unknown number of broken registers before or after the preserved portion of the cuneiform inscription, respectively. The restitution of broken passages was undertaken only where it seemed most obvious and least doubtful. In most cases, however, breaks are rendered unchanged indicating only the equivalent of the broken space within the transliterations.

Erasures are rendered according to the following system:

(over erased <i>sign(s)</i>):	Following text is written over erased cuneiform sign(s)
(over erasure):	Following text is written over an erasure of one or more unknown signs
(erasure: <i>sign(s)</i>):	Erased sign(s) precede or follow text
(erasure):	Erasure of one or more unknown signs precedes or follows text

All transliterations were checked against the original cuneiform tablets several times and as carefully as possible. Although the highest possible conformity with the originals was the primary goal, misinterpretations and omissions cannot be excluded.

13. Note, however, the occurrence of month names belonging to the Drehem calendar (“Reichskalender”) in administrative documents from provenances such as Ešnunna, Ĝirsu, Nippur, and Umma. For a collection of month names and regional calendars of the Ur III period, see Walther Sallaberger, *Der kultische Kalender der Ur III-Zeit*, I (UAVA 7/1; Berlin: Walter de Gruyter, 1993), pp. 7–11.

14. Rykle Borger, *Assyrisch-babylonische Zeichenliste* (AOAT 33/33a, 2d ed.; Kevelaer, Butzon & Bercker, 1981); Friedrich Ellermeier, *Sumerisches Glossar, Band 1, Teil 1: Sumerische Lautwerte*, Lieferung 1. Liste der Lautwerte; Lieferung 2. Nach “Zeichennamen” und Keilschriftzeichen geordnete Lautwertlisten (Theologische und Orientalistische Arbeiten aus Göttingen 4; Nörten-Hardenberg bei Göttingen: Selbstverlag Dr. Friedrich Ellermeier, 1979).

1.3.2.1. Additional Information

Each transliteration of a cuneiform tablet is preceded by a header that briefly lists information about that tablet. The format of the header is as follows:

	Publication Number	
Date		OIM
Transaction		Measurements
Note		Illustration

Note on Date

Assigning a certain date to a text was generally based on the date formula given by the text itself. Dates obtained through different criteria, such as administrative affiliation, seal impressions, and text formula, are given in parentheses if the text does not provide a date at all or in square brackets if the date formulae are broken away or illegible. Ur III year date formulae are identified in accordance with Sigrist and Gomi, *Comprehensive Catalogue*.¹⁶ Although most of the tablets allow for precise dating, some cases remain unclear and call for further study. Where assigned dates are doubtful, they are indicated as such.

The entry for the date of a text has the format **day/month/year**. In case of missing information regarding a tablet's precise date, the chronological arrangement of the texts was carried out according to "year," "month," and "day" by "entry," "no entry," and "entry not preserved," giving the following hierarchy:

<i>Day</i>	<i>Month</i>	<i>Year</i>
x	x	x
-	x	x
[]	x	x
x	-	x
x	[]	x
-	-	x
[]	-	x

[]	[]	[]

Key: x = Entry; - = No entry; [] = Entry not preserved

16. Marcel Sigrist and Tohru Gomi, *The Comprehensive Catalogue of Published Ur III Tablets* (Bethesda: CDL Press, 1991), pp. 317-29.

Within text groups using the so-called min-calendar between the years Šulgi 44 and Šulgi 48, the texts are arranged correspondingly;¹⁷ min-month date formulae are indicated as MONTH 2, diri-month date formulae as MONTH². Texts with date formulae indicating the same date are arranged by the order of their museum numbers.

Note on Transaction

In order to provide a preliminary classification of the contents of a text, the administrative transaction recorded is characterized by a Sumerian phrase abstracted from the actual wording of that text. The individual phrases used are ba-an-ku₄, ba-zi, i-da b₅, i-lá, mu-DU, níġ-ka s₇-ak, šu ba-ti, and zi-ga. For English translations of these phrases and the difficulties involved in providing them, see *Section 2. Catalog of Texts* (Note on the “Transaction” Column), below. Information given in parentheses is not explicitly found in the text, but may be inferred from the context.

Note on Measurements

The size of a tablet is described by the measurements for height, width, and thickness given in millimeters. When the size of a tablet is affected by breaks or other damage, the measurements are followed by “+” to indicate their fragmentary state.

1.3.3. Illustrations

Hand copies or photographs are provided for administrative texts that render difficult or unusual passages, bear paleographically interesting features, or touch questions of particular interest, such as lexicon, orthography, religion, or political history (see *Section 28.3 Plates*).

The hand copies depict the inscribed tablet surfaces in scale 1.5:1. Photographs were made of all sealed tablets and bullae as well as of tablets with physical peculiarities that could not be rendered by hand. In addition, texts of particular paleographical interest were photographed. The scale of the photographs is 1.5:1. It is hoped that the existence of illustrations will contribute to solving some of the problems posed by the tablets’ contents.

1.3.4. Charts

The charts are intended to allow easy access to all of the data with historical and socio-economic relevance as preserved in the cuneiform documents and are meant to facilitate the often tedious task of gathering comprehensive information on certain types of transactions, the officials involved, and their chronological sequence from a rather large corpus of texts (see *Sections 19–23*). Since the arrangement of the actual texts follows a theoretical concept that considers the expending official as the “Leitperson” of an administrative unit, the charts also aim to neutralize the effects of this largely hypothetical construct by analyzing a transaction in reverse order, i.e., focusing on the receiving/accepting official instead of the expending official.

In order to provide full information efficiently, some of the data are repeated throughout the charts, thus risking redundancy. The author hopes, however, that this obvious disadvantage is excused by the attempt to create “user-friendliness.” Detailed notes on contents are found at the beginning of each chart.

1.4. SELECTED NOTES ON THE BUREAUS

The following sections contain brief notes on selected text groups and single documents of particular scientific interest along with pertinent bibliographical references. Notes and comments are neither complete nor exhaustive treatments of questions raised by individual texts but are included to draw attention to some of the philological problems that require further study.

17. For the different calendar systems in use at Puzriš-Dagan during the reign of Šulgi, see Marc Cooper, “The Drehem Calendars During the Reign of Šulgi,” *ZA* 77 (1987): 174–91; and Sallaberger, *Der kultische Kalender* I, pp. 5–6.

1.4.1. Bureau of Narām-ili (Texts 1–15)

Fifteen administrative documents reflect the administrative activities of Narām-ili. Their dates stretch between –/VII/Š 26 (Text 1) and –/X/Š 48 (Text 14), thus covering a period of approximately twenty-two years. With the exception of Texts 1 and 2, seven documents record the transfer of living animals, marked as *mu-ḌU lu gal* “delivery for the king” (Texts 4, 6, 8, 9, 12, 13, 14).¹⁸ The designation *mu-ḌU lu gal* also occurs in Text 1, a document recording the transfer of wool.

Note 10 *lú ḪI-LUM-ma* “10 men of the ...” in Text 2:1 (–/IV/Š 31). A similar phrase is found in connection with workmen in an Ur III administrative document of uncertain provenance: 13 *ḡuruš ḪI-LUM á 2/3* “13 ...-workmen, work performance: 2/3.”¹⁹ In addition, the term *ḪI-LUM* is attested twice following a personal name: 0.0.1 *dam Še[š-ka]l-la / ḪI-LUM*²⁰ and *BAD En-núm-ì-lí / ḪI-LUM LAL*,²¹ the latter reference being included here not without a certain doubt as to its pertinence. As the proper reading and translation of *ḪI-LUM* remain unclear for the time being, we may, however, conclude that *ḪI-LUM* seems to denote some kind of occupation or profession, possibly that of a craftsman.

Text 8:1 (–/I/Š 46) presents a difficult passage: [1^a]^{nš}*esí-sí níta / [K]A-bi ki 2-àm / ì-zì* “1 male *sisû*-equid, its *muzzle is torn*(?) in two places.” A duplicate²² of this document contains an interesting variant of the verbal form *ì-zì*:

Obverse	1	<i>l^{anš}esí-sí / níta</i>	1 male <i>sisû</i> -equid,
	2	<i>KA-bi ki 2-àm / ì-zé</i>	its <i>muzzle is torn</i> (?) in two places;
	3	<i>mu-ḌU lu gal</i>	delivery for the king,
	4	<i>ki Na-ra-am-ì-lí- / ta</i>	from Narām-ili
Reverse	5	<i>É-a-ì-lí</i>	Ea-ilī
	6	<i>ì-dab₅</i>	received it.
	7	<i>iti maš-dà-gu₇</i>	Month: <i>mašda-gu</i> (I).
	8	<i>mu Ki-maš^{ki} ù / Ḫu-ur₅-ti^{ki} / ba-ḫul</i>	Year: <i>Kimaš</i> and <i>Ḫurī</i> were destroyed (Šulgi 46).

In addition to *níta* “male,” the phrase “*KA-bi ki 2-àm ì-zé/zì*” seems to render a further qualification of the animal, most likely a malformation or injury of its mouth, teeth, or nostrils.

For Narām-ili and his activities, see Tohrú Gomi, “The Calendars of Ur and Puzriš-Dagān in the Early Ur-III Period,” *ASJ* 1 (1979): 1–11; Tom B. Jones and John W. Snyder, *Sumerian Economic Texts from the Third Ur Dynasty: A Catalogue and Discussion of Documents from Various Collections* (Westport: Greenwood Press, 1961), pp. 209–11; Sallaberger, *Der kultische Kalender* I, p. 28 n. 111; Sigríst, *DreheM*, pp. 259–69.

1.4.2. “Archive” of Šulgi-simtum (Texts 16–135)

One hundred twenty documents were grouped together under the assumption that they are affiliated with the so-called “archive” of Šulgi-simtum. The texts span the period between –/VI/Š 29 (Text 18) and –/IX/Š 47 (Text 127).

18. For the phrase *mu-ḌU lu gal*, see Tohrú Maeda, “Bringing (*mu-túm*) Livestock and the Puzurish-Dagan Organization in the Ur III Dynasty,” *ASJ* 11 (1989): 95–99.

19. DV 5 493:4 (–/XII/Š 48).

21. Marcel Sigríst, *Neo-Sumerian Account Texts in the Horn Archaeological Museum* (Institute of Archaeology Publications, Assyriological Series, vol. 4; AUCT 1; Berrien Springs: Andrews University Press, 1984), 447:5 (–/–/–).

22. Clarence Elwood Keiser, *Neo-Sumerian Account Texts from DreheM* (BIN 3; New Haven: Yale University Press, 1971), 503 (–/I/Š 46); see Marcel Sigríst, *DreheM* (Bethesda: CDL Press, 1992), p. 31 n. 66.

Administrative activities of the following officials are attested:

<i>Official</i>	<i>Texts</i>	<i>Earliest Text(s)</i>		<i>Latest Text</i>	
Šu-Kūbum	16–20	18	(–/VI/Š 29)	17	(–/IV/Š 31)
Bēlī-ṭāb	21–34	21, 26	(–/II/Š 34)	34	(–/VI/Š 37)
Apilā	35–68	35	(–/IV/Š 38)	66	(–/X/Š 41)
Apilātum	69–84	69	(26/I/Š 42)	77	(4/XII/Š 44)
Ur-lugal-edenaka	85–108	94	(13/VII/Š 45)	108	(18/IV/Š 47)
Šulgi-ilī	109–127	116	(30/IV/Š 47)	115	(5/XI/Š 47)
Aḫīma	128–130	129	(–/I/Š 33)	130	(–/VI/Š 35)
Akala(?)	131	131	(–/IX/Š 43)	—	—
Kalam-ḥenagi(?)	132	132	(–/III/Š 46)	—	—

Within administrative documents belonging to the “archive” of Šulgi-simtum, Aḫīma occurs only in those recording withdrawals.²³ The same observation applies for Kalam-ḥenagi,²⁴ a fact responsible for assigning Text 132 (–/III/Š 46) to the same text group, although contents and formula depart from the “archive’s” general standards. The assignment of Text 132 to the “archive” of Šulgi-simtum, however, remains doubtful.

Text 131 (–/IX/Š 43) records the withdrawal of sheep and goats as a “regular offering” (sá-du₁₁) for Bēlat-Šuḥnir, Bēlat-Teraban, Annunītum, and Ulmašītum. Judging from the occurrence of these goddesses, it seems likely that the text is somehow related to the “archive” of Šulgi-simtum. If this assumption is correct, Akala’s appearance as withdrawing official is extraordinary, since to date he is not attested in this function. The identification of similar documents recording his administrative activities may add to the picture and answer the remaining questions.

Six texts, although issued anonymously, were included in the group of Šulgi-simtum texts. They can be divided into two categories:

Four texts record “regular offerings” (sá-du₁₁) for Bēlat-Šuḥnir and Annunītum (Text 50 [–/I/Š 39]), and Bēlat-Šuḥnir, Bēlat-Teraban, Annunītum, and Ulmašītum (Texts 57 [–/II/Š 40], 67 [–/X/Š 41], 68 [–/XII/Š 41]). The texts are fitted into the order of the withdrawal documents in accordance with their respective date. Their exact relation to those administrative documents within the Šulgi-simtum “archive” that record withdrawals for the goddesses mentioned above, however, needs to be determined more precisely.²⁵

Texts 78 (3/IV/Š 42) and 79 (9/VII/Š 42) both render the month date formula immediately after the z i - g a - entry, thus omitting the name of the withdrawing official. The contents and text formulae of the documents, however, suggest their identification as part of the Šulgi-simtum “archive.”

Tablet OIM A5566 (Text 73; –/VIII/Š 43) is made up of two halves that did not originally belong together. However, both the obverse and reverse of Text 73 do come from tablets that belong to the “archive” of Šulgi-simtum. The obverse dates to the eighth month of the year Šulgi 43 and records a delivery for Šulgi-simtum received by Apilātum. The reverse bears the same date and documents a withdrawal conducted by the same official. It is for this particular reason that the transliteration of Text 73 occurs twice in this volume, once along with the deliveries received by Apilātum and once along with his withdrawals (between Texts 84 and 85). The publication number, 73, is the same in both cases.

23. See Sallaberger, *Der kultische Kalender* I, p. 22.

24. *Ibid.*, p. 22 n. 82.

25. For a detailed discussion of sá-du₁₁-documents within the Šulgi-simtum “archive,” see Kent Hillard, “niga sá-du₁₁ as a Fattening Grade in Ur III Texts,” *ZA* 85 (1995): 11–17; *idem*, “While my article ...,” *N.A.B.U.* 1995, no. 3, September: no. 79.

The transliteration of Text 139 also occurs twice. Text 139 records the withdrawal of animals in Tummal under the authority of Ašniulu. The tablet is dated to 12/VI/Š 42 and grouped together with other administrative documents recording expenditures within the Tummal organization (Texts 138–144). However, the day date formula used in Text 139 is typical for documents belonging to the “archive” of Šulgi-simtum. Although it cannot be said with any certainty at all that the two text groups are actually related in one way or another, a transliteration of Text 139 is also placed between Texts 78 and 79 of the Šulgi-simtum “archive.”²⁶

Note the unusual spellings ^dB e - l a - a t - d a r - r a - 'à - b a - a n (Text 18:6; -/VI/Š 29),²⁷ ^dB e - l a - a t - d a r - 'à - b a - a n (Text 20:3; 4/X/Š 30), ^dB e - l a - a t - ì r - b a (Text 101:4; 18/I/Š 46), and ^dB e - l a - a t - t a r - r a - b a - a n (Text 134:7; date formulae broken). Otherwise not attested to date is the divine name ^dB e - l a - a t - d a - l a - t i m in the phrase é ^dB e - l a - a t - d a - l a - t i [m] (Text 134:11').

The passage l u d u n i g a s á - d u ₁₁ // g i - r a - n ú m / ^dI n a [n a] k á á ú s “one grain-fed sheep, regular offering for the wailing ritual of Inana, ...” (Text 31:1–2; -/I/Š 37) remains unclear. Note also the difficult entry l m á š z a g D U - d è “1 goat, to be put aside(?)” (literally: “1 goat, to place the side”; Text 79:15; 9/VII/Š 42). The actual meaning of this unparalleled phrase is not clear.

Unique is the occurrence of a min-month date formula within an administrative document belonging to the “archive” of Šulgi-simtum.²⁸ Text 96 is dated 18/VII 2/Š 45 and renders i t i e z e m ^dŠ u l - g i / m ì n - k a m (Text 96:12) as its month date formula. Apart from the unparalleled attestation of a min-month name within a Šulgi-simtum text, the month date formula i t i e z e m ^dŠ u l - g i together with the entry m ì n - k a m is highly puzzling in itself, considering that the text dates to the year Šulgi 45. While in accordance with the min-calendar in use at Puzriš-Dagan, i t i e z e m ^dŠ u l - g i (without a min-entry!) marks the second month of Šulgi's forty-fifth regnal year, the same formula usually denotes the seventh month of the same year within the “archive” of Šulgi-simtum. Without assuming a mistake made by a confused scribe, a solution for this problem is lacking.

For recent discussions of the “archive” of Šulgi-simtum, see Sallaberger, *Der kultische Kalender* I, pp. 18–25; Marcel Sigrist, *The Administration at Drehem* (Neo-Sumerian Texts from the Royal Ontario Museum I; Bethesda: CDL Press, 1995), pp. 21–27; idem, *Drehem*, pp. 222–46.

1.4.3. “Shoe-Archive” (Texts 136–137)

Two texts document administrative activities of the so-called “Shoe-Archive.”

For information on the location, officials, and tasks of the “Shoe-Archive,” see Albrecht Goetze, “A Drehem Tablet Dealing with Leather Objects,” *JCS* 9 (1955): 19–21; Sallaberger, *Der kultische Kalender* I, pp. 15–16; Claus Wilcke, “É-sağ-da-na Nibru^{ki} — An Early Administrative Center of the Ur III Empire,” *CRRA* 35 (1988): 311–24.

1.4.4. Tummal (Texts 138–144)

Seven cuneiform tablets record administrative activities in Tummal. The documents cover a period of approximately eight years, 8/VII/Š 40 (Text 138) – 20/VIII/Š 48 (Text 144), and feature Ašniulu and En-diğirğu as extending officials:

-
26. For a possible relation between Ašniulu of Tummal and the “archive” of Šulgi-simtum, see Sallaberger, *Der kultische Kalender* I, p. 23 n. 88.
27. Cf. ^[d]B e - l a - a t - d a r - r a - 'à - b a - a n attested in Brian Lewis and Elizabeth R. Jewell, “Sumerian Economic Texts from the Robert Hull Fleming Museum of the University of Vermont,” *ASJ* 4 (1982): 64, 1:3 (-/X/Š 29).
28. For a discussion of the different calendar systems in use at Puzriš-Dagan and within the “archive” of Šulgi-simtum, see Cooper, “Drehem Calendars During the Reign of Šulgi,” pp. 174–91. See also Sallaberger, *Der kultische Kalender* I, pp. 5–6.

Official	Texts	Earliest Text		Latest Text	
Ašniulu	138–141	138	(8/VII/Š 40)	141	(15/X/Š 43)
En-diġirġu	142–144	142	(13/VI/Š 47)	144	(20/VIII/Š 48)

For notes on Text 139, see *Section 1.4.2. “Archive” of Šulgi-simtum*, above.

The difficult Text 141 (15/X/Š 43) is a *p i s a ġ d u b - b a*-label referring to balanced account(s) prepared with respect to the business activities of Ašniulu of Tummal. It is for this reason that the document was included in the group of Tummal texts, although its exact administrative affiliation remains doubtful. The text reads:

Obverse	1	<i>p i s a ġ d u b - b a</i>	Tablet basket:
	2	<i>n i ġ - k a s ₇ - a k</i>	balanced account(s),
	3	<i>k a l á - a</i>	<i>remainder</i> ,
	4	<i>A š - n i - ù l u</i>	(belonging to) Ašniulu;
	5	<i>l i t i l e z e m ^dŠ u l - g i - / t a</i>	from the seventh month
Reverse	6	<i>[i t] i e z e m a n - n a /</i> <i>u ₄ 15 b a - l z a l l - š è</i>	to the fifteenth day of the tenth month;
	7	<i>i t i l ³ u ₄ 15 - k a m</i>	that is 3 months and 15 days;
	8	<i>m u e n ^dN a n n a /</i> <i>m a š - l e l i - p à d</i>	year: the en-priestess of Nanna was chosen by liver-omen(s) taken from a kid (Šulgi 43).
	9	<i>d u b s a ġ - n i ġ - g u r ₁₁ - r a - k a - n i</i>	His tablet <i>concerning the business-capital</i>
	10	<i>ù d u b b a - B A D - b i i - D I</i>	and its “ba-BAD”-tablet ²⁹ are <i>complete</i> (?). ³⁰ —
	11	<i>i - ġ á l</i>	They are in it.

The administrative significance of this label remains obscure.

For discussions of Tummal as location for cultic and administrative activities, see Setsuko Oh’e, “An Agricultural Festival in Tummal in the Ur III Period,” *ASJ* 8 (1986): 121–32; Sallaberger, *Der kultische Kalender I*, pp. 131–44; Mamoru Yoshikawa, “Looking for Tummal,” *ASJ* 11 (1989): 285–91.

1.4.5. Puzriš-Dagan — The “Central Bureau” (Texts 145–362)

The administrative heart of the Puzriš-Dagan organization was the “bureau” that recorded the receipt of animals from deliveries made by various individuals, on one hand, and simultaneously documented withdrawals from the total amount of livestock thus accumulated, on the other. Withdrawals of animals met the demands of temples, kitchens, and the various branches of the royal household, to name only a few. The complicated administrative procedures conducted at Puzriš-Dagan are the subject of extensive studies by various scholars. A select bibliography is given at the end of this section.

Two hundred eighteen tablets (Texts 145–357) were identified as recording the administrative activities of the “central bureau” of the Puzriš-Dagan organization. They span the period between 5/I/Š 43 (Text 145) and 6/XI/Š

-
29. The meaning and administrative significance of the expression *ba-BAD* in the context of the present document are uncertain. While the phrase *dub ba-BAD* occurring in a Drehem cuneiform tablet is not unlikely to refer to a specific administrative account dealing with dead animals (reading: *ba-úš/ug₇*), the term *ba-BAD* is also attested as a classification of workmen in Ur III administrative documents from Ġirsu. For a discussion of this latter meaning of *ba-BAD*, see Robert K. Englund, *Organisation und Verwaltung der Ur III-Fischerei* (BBVO 10; Berlin: Dietrich Reimer Verlag, 1990), pp. 134–38.
30. The translation of the verbal form *i-DI* is tentative. In a different administrative context, the expression *i-DI* is attested to refer to parts of an animal carcass: *l LÚ.BU munus ba-úš // á-bi kuš-bi i-DI* “1 dead female ... animal, its horns and its hide are in *good condition*”; see Francesca Rochberg-Halton and Paul Zimansky, “The University of Iowa Cuneiform Texts,” *JCS* 31 (1979): 133 no. 1 (Case). In both passages, the reading *sili m* for the sign *DI* appears to be the most appropriate one; see CAD Š/1 209 s.v. *šalāmu* v., lexical section.

48 (Text 357). Based on the analysis of text formulae and contents, the documents can be divided into four different groups:

1. Delivery records (m u - D U) issued anonymously (Texts 145–212)
2. Withdrawal records (z i - g a) issued anonymously (Texts 213–255)
3. Delivery records (m u - D U) issued under the authority of Nasa (Texts 256–294)
4. Records of expenditures (b a - z i, z i - g a, ì - d a b₅, š u b a - t i, b a - a n - k u₄) issued under the authority of Nasa (Texts 295–362)

In order to provide a straightforward and comprehensive overview of the administrative activities of Nasa, all expenditures made in his name are assembled in chronological order (Texts 295–362). This arrangement, however, does not reflect the distinction between withdrawals made directly from deliveries (m u - D U) to the “central bureau” in Puzriš-Dagan and expenditures possibly embedded in a different administrative context. The full extent of Nasa’s involvement in different administrative procedures at Puzriš-Dagan therefore remains poorly represented, with its delineation below the desirable level.

Text 171 (13/X/Š 44) lists a total of twenty-nine g ú - g u r₅-animals. The animals are qualified as l i b i r, m u n u s, n í t a, n í t a m u - 1, n í t a m u - 2, and n í t a m u - 3.³¹ g ú - g u r₅-animals appear also in a balanced account from the Ur III period (AO 19548), prepared with respect to the administrative activities of Nasa between -/XII/Š 44 and -/X/Š 48.³² Line 19 (rev.) renders the entry 3 0 - l á - 1 g ú - g u r₅ following a section listing cervids and preceding a list of various kinds of equids. The time period in respect to which the balanced account is prepared, the identical number of g ú - g u r₅-animals, and their extreme rarity in administrative documents from the Ur III period bring about the tempting speculation whether both texts — AO 19548 and Text 171 — refer to the same group of g ú - g u r₅-animals. Were this speculation correct, it might also support the assumption that m u - D U- and z i - g a-records issued anonymously within the Puzriš-Dagan organization were already prepared under the authority of and in reference to Nasa.³³ Without further proof, however, this line of argumentation remains mere speculation.

Text 213 is dated -/X/Š 42 and therefore is — strictly speaking — too old to be included unquestionably in the group of z i - g a-records issued anonymously by the Puzriš-Dagan organization from the first month of Šulgi’s forty-third regnal year on. However, since the formula found in Text 213 is identical with that of the slightly younger z i - g a-records, it precedes these texts in the present volume; its exact administrative affiliation, however, remains uncertain.

The reading s ì m (D I) in the personal name N a - s ì m (D I) (Text 225:4; 3/IX/Š 43) is based on the syllabic variant N a - s i - i m, which is attested in a seal inscription impressed on two Ur III administrative documents from Nippur. The seal inscription reads N a - s i - i m // d u m u U r - d M a - m [i];³⁴ the more common writing N a - s ì m (D I) of the same personal name occurs in the cuneiform text of both tablets.³⁵

The significance of the passage u d u k u r u š d a // d u m u - m u n u s l u g a l - k a // L Ú . S U - t a “sheep belonging to the animal fattener of the king’s daughter, from Šimaški(?)” in Text 261:4–6 (-/IX/Š 47) remains obscure. The translation attempted here is tentative.

31. The title s i p a g ú - g u r₅ (DC EPHE 274:7 [6/I/Š 46]; PDT 1 594:27 [4/III/AS 1]) suggests that g ú - g u r₅-animals were kept together in herds.

32. Danièle Calvot, “Deux documents inédits de Šelluš-Dagan,” RA 63 (1969): 101–03 (AO 19548).

33. For this assumption, see Sallaberger, *Der kultische Kalender* I, p. 28 n. 111.

34. NRVN 243 and NSATN 510.

35. NRVN 243:3 and NSATN 510:3. Cf. Herbert Sauren, “Untersuchungen zur Schrift- und Lautlehre der neusumerischen Urkunden aus Nippur,” ZA 59 (1969): 25–26 no. 35.

Text 330:5–11 (20/IV/Š 47) presents the following extraordinary passage:

Obverse	5	l gu ₄ 5 u ₈	1 ox, 5 ewes
	6	dam Šar-ru-um-ì-lí	(for) the wife of Šarrum-ili;
	7	l gu ₄ 5 u ₈	1 ox, 5 ewes
	8	dam dŠul-gi-ì-lí / mar-tu	(for) the wife of Šulgi-ili, the Amorite;
Reverse	9	l gu ₄ 5 u ₈	1 ox, 5 ewes
	10	dam Du-uk-ra	(for) the wife of Dukra;
	11	u ₄ dumu in-tu-eš-šè	for the day when they (each) gave birth to a child.

Note the difficult passage in the beginning of Text 358:1–2 (–/XI/Š 48): 3 dúsu níta // bar lá-ì luga l-ra / ús-sa. The reading of line two is tentative and a translation is therefore not offered.

For studies on the Puzriš-Dagan organization and the person and administrative activities of Nasa, see Wolfgang Heimpel, “Zu den Bezeichnungen von Schafen und Ziegen in den Drehem- und Ummatexten,” *BSA* 7 (1993): 115–60; Jones and Snyder, *Sumerian Economic Texts*, pp. 212–38; Maeda, “Bringing (mu-túm) Livestock,” pp. 69–111; idem, “The Receiving and Delivering Officials in Puzriš-Dagan,” *ASJ* 15 (1993): 297–300; Sidney B. Nelson, “Nasha: A Study of Administrative Texts of the Third Dynasty of Ur,” Ph.D. diss., University of Minnesota, 1972; Sallaberger, *Der kultische Kalender I*, pp. 26–36; Sigrist, *Administration at Drehem*; idem, *Drehem*; Piotr Steinkeller, “Sheep and Goat Terminology in Ur III Sources from Drehem,” *BSA* 8 (1995): 49–70.

1.4.6. Bureau of Enlila (Texts 363–366)

Four texts record the administrative activities of the so-called “breeding official” Enlila, Texts 363 (22/VIII/Š 43) – 366 (–/VIII/Š 46).

For a description of Enlila’s function within the Puzriš-Dagan organization and the transactions handled by him, see Jones and Snyder, *Sumerian Economic Texts*, pp. 218–22; Maeda, “Bringing (mu-túm) Livestock,” pp. 76–77, 79; Sigrist, *Administration at Drehem*, pp. 51, 68, 92–93; Sigrist, *Drehem*, pp. 248–57.

1.4.7. Bureau of Iddin-Irra (Texts 367–368)

Texts 367 and 368 record the delivery and expenditure of garments, respectively. Both transactions feature Iddin-Irra, the fuller, as the principal official.

For more information on Iddin-Irra, see Yukiko Kuga, “A Šulgi-simtum Tablet in the Atarashi Collection,” *ASJ* 17 (1995): 312–17; Sigrist, *Administration at Drehem*, p. 20; idem, *Drehem*, p. 401.

1.4.8. Bureau of Nalu (Texts 369–415)

Forty-seven tablets, Texts 369 (2/III/Š 44) – 415 (2/XII/Š 48), account for expenditures (ba-zi, zi-ga, ì-da b₅, šu ba-ti) of living and dead animals conducted by Nalu during the reign of Šulgi. As in the case of Nasa (see Section 1.4.5. *Puzriš-Dagan — The “Central Bureau,”* above), all pertinent records are arranged in chronological order, leaving aside the eventually different administrative contexts of the individual transactions.

Attention may be called to the unusual entry ġìri má nésa ġ “passage of the nesaġ-ship” (Text 391:6; 7/XII/Š 45).³⁶ The phrase ġìri má is attested in several Ur III administrative documents referring to various kinds of ships, e.g., ġìri má zì-da-ka,³⁷ ġìri má še ġiš-ì-ka,³⁸ 6 ġuruš u₄ 20-šè / ġìri má

36. For má nésa ġ, see Sallaberger, *Der kultische Kalender I*, pp. 154, 155 (nn. 744, 748, 749), 180–81, 245, fig. 61a.

37. Daniel C. Snell, “The Ur III Tablets in the Emory University Museum,” *ASJ* 9 (1987): 241, 20:9.

38. *ITT* 4 8150 = Edmond Sollberger, *Business and Administrative Correspondence under the Kings of Ur* (TCS 1; Locust Valley: J. J. Augustin, 1966), 212:7.

mušen-ka / 60 ġuruš u₄ 10-šè / má mušen-da ġin¹-na,³⁹ zi-ga ġiri má mušen;⁴⁰ compare also ġiri ezem má an-na / KWU 734-ra.⁴¹

Note also the unique passage 1 udu niga // ^dDam-gal-nun-na // kíġ gal Eridug^{ki} “1 grain-fed sheep // (for) Damgalnuna, // great ‘meal’ (of?) Eridug” (Text 392:3–5; 4/XII²/Š 45).⁴²

The year date formula given in the Texts 398–401 (mu ús-sa Ur-bí-lum^{ki} ba-ġu¹) is ambiguous, since within Ur III administrative documents it may be employed to denote the year Šulgi 46 (variant Šulgi 46a) as well as the year Amar-Suena 3 (variant Amar-Suena 3a). Note, however, the consequent use of the date formula variant, mu ġišġu-za ^dEn-líl-lá ba-dím, which indicates the year Amar-Suena 3 in withdrawal documents issued under the authority of Nalu during that year.⁴³ A detailed study on the usage of year date formulae within individual bureaus of the Puzriš-Dagan organization is desirable to shed more light on the problem of ambiguous datings.

For selected studies on Nalu and his administrative activities within the Puzriš-Dagan organization, see Maeda, “Bringing (mu-túm) Livestock,” pp. 87–89; M. Mahoney, “A Study in Sumerian Administrative History,” Ph.D. diss., University of Minnesota, 1965; Sallaberger, *Der kultische Kalender* I, p. 211; Sigrist, *Administration at Drehem*, pp. 43–45, 74–75; idem, *Drehem*, pp. 257–59, 305–06.

1.4.9. Bureau of Aġūni (Texts 416–428)

Twelve of the thirteen cuneiform tablets record the transfer of animals — primarily oxen — from Aġūni to Nasa between 25/VIII/Š 45 (Text 417) and 3/V/Š 46 (Text 428). One document (Text 416; 8/IV 2/Š 44) deals with the expenditure of a dead lamb accepted by Ur-niġar.

The reading and significance of Text 421:5 (24/VIII/Š 46), é MI-NE-la- / aš ġa-la-a “allotted to/for the ... -house,” remains uncertain. Text 427:2 (26/IV/Š 46) contains the professional title lú kušpa₅-^{PAN.X}/_{PAN.X}. The spelling of the leather bag kušpa₅-^{PAN.X}/_{PAN.X} appears to represent an earlier orthographic variant of kušpa₅-^{ŠIR.LU.SU}/_{ŠIR.LU.SU} attested in Šulgi Hymn D, lines 234, 348, and 378.⁴⁴ However, the reading and translation of 427:2 remain enigmatic. Note the following remarkable passage in Text 428:11–15 (3/V/Š 46):

Reverse	11	4 gu ₄ niga saġ gu ₄	4 grain-fed “head-ox” oxen,
	12	5 gu ₄ niga	5 grain-fed oxen,
	13	7 gu ₄ 8 sila ₄ ga	7 oxen. 8 suckling lambs
	14	ġišbun _x (KI.BI) é ^d En-líl / ^d Nin-líl	(for) the banquet (of?) the temple of Enlil (and) Ninlil;
	15	u ₄ énsi Ki-maš ^{ki} in-ma- / dab ₅ -lbal-a	on the day the governor of Kimaš was captured. ⁴⁵

For more detailed information on Ahūni and his activities, see Jones and Snyder, *Sumerian Economic Texts*, pp. 221, 224, 228, 234, 237; Maeda, “Bringing (m u - t ú m) Livestock,” pp. 92–93; Sigrist, *Administration at Drehem*, pp. 51–52, 54–55; idem, *Drehem*, pp. 257–59, 315–17.

1.4.10. Bureau of Lu-diğira, Son of Inim-Šara (Texts 429–454)

Twenty-seven administrative documents cover the period between 24/VIII/Š 46 (Text 429) and 1/I/Š 48 (Text 452). The administrative affiliation of Text 454 (–/IX/Š 47) is questionable; therefore, its transliteration follows those of the regular records of expenditures made by Lu-diğira.⁴⁶

For treatments of Lu-diğira’s activities within the Puzriš-Dagan organization and the criteria for his distinction from Lu-diğira, son of ÌR-ğula, see Maeda, “Bringing (m u - t ú m) Livestock,” pp. 90–91; idem, “Receiving and Delivering Officials,” pp. 297–300; Sigrist, *Administration at Drehem*, pp. 50 n. 1, 52, 54, 55–57, 73–74; idem, *Drehem*, pp. 257–59, 324–27.

1.4.11. Bureau of Lu-diğira, Son of ÌR-ğula (Texts 455–457)

For information on Lu-diğira, son of ÌR-ğula, see the bibliographic references given in the preceding section.

1.4.12. Bureau of Ur-kununa (Texts 458–459)

The administrative activities of Ur-kununa, the official responsible for the management of small livestock in Puzriš-Dagan during the reign of Šulgi, are documented in Texts 458 (22+x/XII/Š 46) and 459 (30/VII/Š 47). Unfortunately, both tablets are poorly preserved.

For a detailed description of the duration and character of Ur-kununa’s professional career within the Puzriš-Dagan organization, see Jones and Snyder, *Sumerian Economic Texts*, pp. 218–21; Maeda, “Bringing (m u - t ú m) Livestock,” pp. 76–80; Sigrist, *Administration at Drehem*, pp. 35, 91–93, 100–01, 105–06; Sigrist, *Drehem*, pp. 269–72, 306–07.

1.4.13. Documents Issued by Various Bureaus (Texts 460–480)

This group of administrative documents spans the period between –/VIII/Š 35 (Text 460) and –/II/Š 48 (Text 480). The seal impressed on Text 460 (–/VIII/Š 35) bears the following inscription:

1	ḫŠul-gi-sí-im-!ti!	Šulgi-simti,
2	lukur ki-áğ lugal	beloved wife of the king:
3	ğa-lí-lí dub-sar	ğalili, the scribe,
4	dumu ḫŠul-i-lí arad-zu	the son of Šu-ilī, is your servant.

Šulgi-simtum’s title “lukur”⁴⁷ is attested in two other seal inscriptions from the Ur III period.⁴⁸ The seal inscription links Text 460 to administrative documents belonging to or affiliated with the “archive” of Šulgi-simtum. Therefore, it is conceivable that the expending official mentioned in Text 460:4, Barbaria, is identical with a person

46. See Section 12.5. Related Document (Year Šulgi 47, Month IX).

47. See Piotr Steinkeller, “More on the Ur III Royal Wives,” *ASJ* 3 (1981): 78–79.

48. V. Scheil, “Nouvelles notes d’épigraphie et d’archéologie assyriennes, xxvii: La Dame Dungi-zimti,” *RT* 37 (1915): 130–31 (–/VI/Š 32) and *PDT* 1 530 (–/VIII/Š 46), the latter is parallel in structure and contents to the sealing on Text 460, both differ only in the personal names featured. For both seal inscriptions, see now Douglas R. Frayne, *The Royal Inscriptions of Mesopotamia, Early Periods, Vol. 3/2: Ur III Period (2112–2004 BC)* (Toronto: University of Toronto Press, 1997), pp. 172–73 nos. 69 and 70.

named Barbaria who occurs frequently within Šulgi-simtum texts.⁴⁹ However, this identification cannot be proved beyond doubt.

Of particular interest are Texts 462 (–/V/Š 39; tablet) and 463 (envelope) recording the expenditure of four gur of barley by Inanaka. It remains speculative whether the document — despite a month date formula of the Drehem calendar — can be linked to Inanaka of Nippur, daughter of Enlil-amah and high priest of Enlil.⁵⁰ The tablet and envelope offer the orthographic variants P Û . Š A - Ì - š u (Texts 462:3, 463:4) and P Û . Š A - Ì - š u m (Text 463, seal:1).

Note the unusual sequence s á - d u₁₁ g u - l a, s á - d u g₅ f ú s l, s á - d u g₅ k u₅ - t a in Text 468:1–4 (6/II 2/Š 44).

The date and provenance of Text 471 (–/II/Š 46 / AS 3) remain doubtful. Although the month date formula i t i š e š - d a - g u₇ denotes the second month of the calendar system employed within the Puzriš-Dagan organization, the entry š à k á^d N a - n a - / t u m - m a (Text 471:5) raises justified doubts about the actual provenance of the tablet. Is it possible to associate the “Gate of Nannatum” with d^Ĝ e š t i n - a n - n a N a - n a - t u m attested in two Ur III administrative documents?⁵¹ In addition, the proper name “Nannatum” occurs in three cuneiform texts from Umma dating to the Ur III period, k u n - z i / N a - n a - t u m,⁵² k u n - z i - d a N a - n a - t u m - m a,⁵³ and é r i n N a - n a - t u m - m a - š è g i₄ - a / g u b - b a.⁵⁴ Evidently, on the basis of data this sparse, the exact localization of Ka-Nannatum remains problematic; however, it appears likely that Ka-Nannatum was situated in the province of Umma.

Equally questionable are the provenance and administrative affiliation of Text 476 (–/XII/Š 47), a p i s a ĝ d u b - b a-label. While the month names rendered belong to the Drehem calendar, the entry k i L ú - g i - n a š a b r a // é a m a r - r a É - d Š á r a^{ki} (Text 476:5–6) points to Umma as the location of the transactions to which the label refers. Note also the writing É^{lum} for the Akkadian *bītum* in the second register of the same tablet.⁵⁵

1.4.14. Documents of Unclear Affiliation (Texts 481–499)

Primarily due to its poor state of preservation, Text 482 (–/VIII/Š 35; envelope with tablet inside; pl. 39) yields various problems. It was not possible to remove the envelope from the tablet without destroying it. Therefore, the information provided by the transliteration and photographs remains inadequate.

The difficult administrative document Text 483 (–/III/Š 37)⁵⁶ is of uncertain provenance and reads as follows:

49. In this volume, e.g., see Texts 19:4 (–/VII/Š 30), 26:3 (–/II/Š 34; in both texts as “ĝiri-official”), 35:2 (–/IV/Š 38), 38:6 (30/IV/Š 39).

50. For Inanaka, see William W. Hallo, “The House of Ur-Meme,” *JNES* 31 (1972): 91–92; Richard L. Zettler, “The Genealogy of the House of Ur-Me-me: A Second Look,” *AJO* 31 (1984): 6; idem, *The Ur III Temple of Inanna at Nippur: The Operation and Organization of Urban Religious Institutions in Mesopotamia in the Late Third Millennium B.C.* (BBVO 11; Berlin: Dietrich Reimer Verlag, 1992), pp. 203–04.

51. DV 5 236: II 15 and BCT 2 294:10; the date and provenance of the latter, however, are also uncertain.

of a Goddess — Taking ‘Inventory’ in Ereš”) given by the author at the 205th Meeting of the American Oriental Society, Salt Lake City, March 26–29, 1995.

Text 485:7–11 (–/IV/Š 42) contains the following unusual passage:

Obverse	7	š u - n i ġ i n 30 - l á - l g u ₄	Total: 29 oxen;
Reverse	8	k i ù n u - e - n e - / t a	from the cowherds
	9	m u g u ₄ a n š e P Û . Š A - E š ġ - t á r	— because Puzur-Eštar,
		đ u m u l u g a l - k e ₄	the son of the king,
	10	b a - a n - l a ħ ₅ - ʾ a l - š è	had taken away horned cattle and equids —
	11	l - m i - i d - D I Ğ I R l - d a b ₅	Imid-ilim received them.

Unfortunately, the tablet does not provide any further details about the administrative background of this cattle transfer. The provenance of Texts 481 (–/–/Š 32), 489 (–/XII/Š 43), and 495 (–/XII/Š 47) is uncertain; the month date formulae given in Texts 489, rev. 1', and 495:7 are ambiguous and therefore do not suffice to establish a specific provenance for both administrative documents.

2. CATALOG OF TEXTS

The catalog of texts is intended to provide a quick insight into the physical appearance, date, contents, administrative significance, and peculiarities of the individual documents. In addition, this catalog illustrates textual similarities in formula and contents within single text groups as well as the differences between them. Information given in parentheses is not explicitly found in the text but may be inferred from the context.

The catalog lists the following pertinent information on each text:

Text Number
 OIM
 Tablet Measurements (in mm)
 Date
 Subject (English)
 Transaction (English)
 Principal(s) (Sumerian)
 Additional Information (English, Sumerian)

Note on the "Subject" Column

The order of the entries for each text is identical with the order of their first appearance within that text. Consequently, subjects recurring within a text are listed only once. Singular and plural are distinguished where necessary and possible. The entries do not distinguish gender, color, provenance, or any other specific designations of the animals recorded. The different kinds of birds mentioned in administrative documents from the so-called "archive" of Šulgi-simtum are summarized by the term "fowl."

Note on the "Transaction" Column

The transaction column contains English terms characterizing the transaction(s) recorded by the individual administrative documents. English terms were chosen in order to enable the non-Assyriologist to get a rough impression of the transactions recorded. However, it must be vigorously emphasized that the English equivalents presented here are not to be understood as final translations of the Sumerian phrases to which they correspond and do not claim to grasp the complete administrative significance of these Sumerian phrases. This caution applies in particular for the renderings of *ì-d a b₅* and *š u b a - t i*, the accurate semantic distinction of which still remains to be defined for administrative documents of the Ur III period in general.¹ The English equivalents suggested here should be considered nothing more than a tentative working hypothesis:

<i>b a - a n - k u₄</i>	—	Remitted
<i>b a - z i</i>	—	Withdrawn
<i>ì - d a b₅</i>	—	Transferred
<i>ì - l á</i>	—	Weighed
<i>m u - D U</i>	—	Delivery
<i>n í ġ - k a s₇ - a k</i>	—	Balanced Account
<i>š u b a - t i</i>	—	Accepted
<i>z i - g a</i>	—	Withdrawal

1. Cf. Walther Sallaberger, *Review of Drehem*, by Marcel Sigrist, *BiOr* 52 (1995): 444, 1.8.

Note on the “Principal” Column

This column lists the principal official(s) of a transaction as given by the Sumerian text. Principal officials are considered those individuals who are immediately concerned with the acceptance, transfer, withdrawal, or — generally — the responsible handling of animals and goods, as well as the officials who are referred to as *maškim* or whose names occur within the *giri*-formula. As a rule, the entries for the latter group of officials (*maškim*, *giri*) follow entries for the former in the order of their appearance within the transaction account. The transliteration renders the name of the principal officials along with the Sumerian context defining the character of the transaction recorded. The beginning of new registers as well as indented lines are not marked in the transliteration. Entries referring to different account sections of the same administrative document are separated by “;” and entries referring to the same account section are separated by “,” if necessary.

Note on the “Additional Information” Column

This column is reserved for comments on the occasional peculiarities of cuneiform tablets, such as physical appearance, seal impressions, unusual words or phrases, hapax legomena, or generally additional information given along with the account of a transaction. Moreover, the destinations of animals expended for cultic purposes, the kitchen, soldiers, messengers, and foreign envoys are fully included in transliteration. Passages too poorly preserved for complete or partial restoration, however, are omitted. The beginning of new registers as well as indented lines are not marked in the transliteration. Entries referring to different account sections of the same administrative document are separated by “;” and entries referring to the same account section are separated by “,” if necessary.

17. INDICES

17.1. INDEX OF SUMERIAN WORDS

The following indices render a complete list of the words and proper names occurring within the texts. With the exception of several frequently attested lemmata, the entries for each lemma comprise the quote as well as the complete register of text containing the reference. Where necessary the context of the preceding and/or the following register is added. The beginning of a new register is marked by “//” and indented lines are marked by “/”; in general, the transliterations follow the conventions described in *Section 1.3.2. Transliterations*. Cross-references are inserted throughout the indices in order to facilitate their use and improve their clearness.

18. YEAR DATE FORMULAE

Transliterations of the individual year date formulae attested are arranged in alphabetical order and given in boldface followed by the specific citations as they occur in the texts. The individual citations are arranged in the numerical order of their publication numbers.¹ Each reference includes the publication number, OIM number, date, and designation of the issuing bureau. Within the transliterations of the year date formulae, “//” marks the beginning of a new register and “/” marks indented lines within a register.

19. CONVEYANCE OF ANIMALS AND GOODS

The following three charts deal with the conveyance (*ì-dab₅, šu ba-ti*) of animals and goods between at least two officials/bureaus. The entries for pertinent administrative documents are arranged according to the names of the receiving officials/bureaus in alphabetical order (19.1), by date (19.2), and by publication number (19.3). In order to avoid confusion, the difference between text groups using the min-calendar and those which do not is not taken into account within the charts. Consequently, for the years Šulgi 44 to Šulgi 48, entries for texts containing a min-month date formula follow entries for texts dating to the corresponding regular month.

In order to further the usability of the charts and to keep their size under control, the term “cattle” within the subject column was chosen to denote all kinds of quadrupeds mentioned in the administrative documents without referring to specifics, such as species, gender, or number of the animals conveyed.

Information given in parentheses is not explicitly found in the text but may be inferred from the context.

20. WITHDRAWAL OF ANIMALS AND GOODS

The following three charts deal with the withdrawal (*ba-zi, sá-du₁₁, zi-ga*) of animals and goods by various officials/bureaus. The entries for pertinent administrative documents are arranged by the names of the withdrawing officials/bureaus in alphabetical order (20.1), by date (20.2), and by publication number (20.3). In order to avoid confusion, the difference between text groups using the min-calendar and those which do not is taken into account within the charts. Consequently, for the years Šulgi 44 to Šulgi 48, entries for texts containing a min-month date formula follow entries for texts dating to the corresponding regular month.

In order to further the usability of the charts and to keep their size under control, the term “cattle” within the subject column was chosen to denote all kinds of quadrupeds mentioned in the administrative documents without referring to specifics, such as species, gender, or number of the animals withdrawn. Fowl are listed separately.

Information given in parentheses is not explicitly found in the text but may be inferred from the context. The entry “(dead) cattle” within the Subject column applies to texts that list living and dead quadrupeds.

21. DELIVERY OF ANIMALS AND GOODS

The following three charts deal with the delivery (*mu-DU*) of animals and goods to various officials/bureaus. The entries for pertinent administrative documents are arranged by the names of the receiving officials/bureaus in alphabetical order (21.1), by date (21.2), and by publication number (21.3). In order to avoid confusion, the difference between text groups using the min-calendar and those which do not is not taken into account within the charts. Consequently, for the years Šulgi 44 to Šulgi 48, entries for texts containing a min-month date formula follow entries for texts dating to the corresponding regular month.

In order to further the usability of the charts and to keep their size under control, the term “cattle” within the subject column was chosen to denote all kinds of quadrupeds mentioned in the administrative documents without referring to specifics, such as species, gender, or number of the animals delivered. Fowl are listed separately.

Information given in parentheses is not explicitly found in the text but may be inferred from the context.

22. OTHER TRANSACTIONS, TRANSACTION NOT PRESERVED

The following three charts deal with transactions other than those covered by Sections 19 through 21. In addition, entries for texts that do not preserve any information concerning the transaction recorded have been included. The entries for pertinent administrative documents are arranged by the names of the acting officials/bureaus in alphabetical order (22.1), by date (22.2), and by publication number (22.3). In order to avoid confusion, the difference between text groups using the min-calendar and those which do not is not taken into account within the charts. Consequently, for the years Šulgi 44 to Šulgi 48, entries for texts containing a min-month date formula follow entries for texts dating to the corresponding regular month.

Information given in parentheses is not explicitly found in the text but may be inferred from the context.

23. EXPENDITURE OF ANIMALS AND GOODS FOR CULTIC PURPOSES

The following two charts deal with the expenditures of animals and goods for cultic purposes, religious festivals, or temples. Included are entries for all administrative documents that exclusively or partly contain records of such expenditures. The entries are arranged by date (23.1) and by publication number (23.2). In order to avoid confusion, the difference between text groups using the min-calendar and those which do not is not taken into account within the charts. Consequently, for the years Šulgi 44 to Šulgi 48, entries for texts containing a min-month date formula follow entries for texts dating to the corresponding regular month. The format of the information provided here is closely related to the format used in *Section 2. Catalog of Texts*.

24. SEALED OBJECTS

The following three charts list the sealed objects published in this volume. The entries are arranged by the names of the sealing officials in alphabetical order (24.1), by date (24.2), and by publication number (24.3).

The individual registers of a seal inscription are separated by “,” and “/” marks indented lines. The name of the sealing official occurs in boldface. Photographs are provided for all of the texts listed in the following charts (see *Section 28.3. Plates*, below).

24.1. ARRANGED BY SEALING OFFICIAL (ALPHABETICAL)

25. TEXTS IN CHRONOLOGICAL ORDER

The following chart lists entries for the administrative documents in chronological order. In order to avoid confusion, the difference between text groups using the min-calendar and those which do not is not taken into account within the chart. Consequently, for the years Šulgi 44 to Šulgi 48, entries for texts containing a min-month date formula follow entries for texts dating to the corresponding regular month.

Information given in parentheses is not explicitly found in the text but may be inferred from the context. The entry “cattle” generally refers to all kinds of quadrupedal livestock. Fowl are listed separately. The entry “(dead) cattle” within the Subject column applies to texts that list living and dead animals. For more detailed information as to the specific kinds of animals dealt with, see *Section 2. Catalog of Texts*.

27. TEXTS PREVIOUSLY TREATED

The following two charts contain bibliographical references to previous treatments of the Oriental Institute cuneiform tablets edited in this volume.¹ A reference may point to the complete publication of a cuneiform tablet as well as to notes on its contents or administrative significance. Only the most important and most recent references are listed.²

The entries are arranged by publication number (27.1) and by museum number (27.2).

27.1. ARRANGED BY PUBLICATION NUMBER

<i>Text</i>	<i>OIM</i>	<i>Reference</i>
20	A2957	Cohen, <i>Cultic Calendars</i> , p. 474
33	A4165	Cohen, <i>Cultic Calendars</i> , pp. 211, 252–53 (partially translated), 475
62	A4233	Cohen, <i>Cultic Calendars</i> , p. 473

314	A5777	Buccellati, <i>Amorites</i> , pp. 20, 290–93, Appendix, no. 13 (hand copy)

1. References to cuneiform texts of the Oriental Institute tablet collection also occur passim in the following books by Ignace J. Gelb: *Hurrians and Subarians* (SAOC 22; Chicago: The University of Chicago Press, 1944); *Old Akkadian Writing and Grammar* (MAD 2; Chicago: The University of Chicago Press, 1952; 2nd ed. 1961); *Glossary of Old Akkadian* (MAD 3; Chicago: The University of Chicago Press, 1957); *Computer-Aided Analysis of Amorite* (AS 21; Chicago: The Oriental Institute, 1980).

For references to city governors attested in Oriental Institute cuneiform texts from the reign of Šulgi, see now Douglas R. Frayne, *The Royal Inscriptions of Mesopotamia, Early Periods, Vol. 3/2: Ur III Period (2112–2004 BC)* (Toronto: University of Toronto Press, 1997), pp. 190–95.

2. For references to cuneiform texts of the Oriental Institute tablet collection treated in Buccellati, *Amorites*, see his chart on page 365 "New Texts." For a discussion of individual Amorite personal names occurring within these texts, see Chapter 3: List of Names, s.vv., and Chapter 4: Analysis of Amorite Names, s.vv. In addition, references to individual texts occur passim within Chapter 7: The Homeland of the Amorites, Chapter 8: Geographical Distribution in the Sumerian Cities (see specifically 2: Drehem), and Chapter 9: Social Stratification. The tablet OIM A2882 (see Buccellati, *Amorites*, pp. 17, 238–41, 300, Appendix, no. 2 [hand copy]), erroneously dated to 4/I/Š 44 by Buccellati, actually dates to 4/I/AS 7 and is therefore not included in this volume or in the following charts.
